PROFESSIONAL SUMMARY

I am a third-year Information Systems Engineering student at Kocaeli University with a strong passion for building technology solutions that drive efficiency, security, and intelligent decision-making. My academic foundation in data-driven systems, combined with hands-on development experience, has fueled my interest in backend development, machine learning, and game systems.

As a solo developer, I've built Java game plugins and React web applications from the ground up—managing everything from architecture and implementation to deployment and maintenance. This end-to-end ownership has given me deep insight into the challenges faced by product managers, technical leads, and engineers across the development lifecycle.

I'm seeking a summer internship where I can contribute to impactful projects in backend development, gaming, or machine learning, while learning from experienced teams in fast-paced, innovative environments.

PROFESSIONAL SKILLS

- Java
- C#
- TypeScript
- JavaScript
- SQL
- Virtualization
- Troubleshooting
- Leadership
- Negotiation
- Analytical
- Critical Thinking

LANGUAGE SKILLS

- Turkish, Native
- English, Upper-Intermediate

EDUCATION

Bachelor's Degree in Information Systems Engineering

2025-NOW

KOCAELI UNIVERSITY

- This program includes not only computer science and engineering lectures but also modern and specialized subjects such as machine learning, deep learning, image processing, and artificial intelligence.
- Fundamentals: Calculus, Physics, Linear Algebra, Diff. Equations, Discrete Math.
- Tech: C# .NET (Visual and Backend), Java (Mobile and Backend)

Associate Degree in Computer Programming

2022-2024

MARMARA UNIVERSITY

- I have completed lectures in algorithms, web design, web programming, visual programming, object-oriented programming, game development, computer networks, statistics, and mathematics.

PROJECTS

Sole Developer

JAN 2026-NOW

FirstSpawn - Minecraft & Hytale Game Server Exploration (WIP)
firstspawn.com

- Develop a scalable game server listing platform.
- Prioritize maintainability and user experience.
- Deliver a backend-focused web application.

Tech: Java, React, Typescript, NestJS, PostgreSQL, Prisma, Elasticsearch, Redis, Passport.js

Co Developer

DEC 2025

graphSNA - Graph Visualization Tool
github.com/DevBD1/graphSNA

- Developed a Social Network Analysis (SNA) tool using C# and Windows Forms.
- Implemented complex graph theory algorithms to visualize node-edge relationships and calculate centrality metrics.
- Designed an interactive User Interface (UI) for dynamic data entry and real-time network visualization.
- Optimized data structures to efficiently handle and process complex graph topologies.

Tech: C#, .NET

Sole Developer

APR 2025-NOW

Kukso Studios - Minecraft & Hytale Plugins (Product)
kukso.com (+1k downloads)

- Developed modular plugins using Spigot API and HytaleServer API.
- Developed projects that complied with OOP principles.
- Prioritized maintainability and config-driven customization.
- Developed the web app myself as well; it's a site without a backend, but it helped me get closer to React.

Tech: Java, React, Typescript

Sole Developer

FEB-JUNE 2025

Routiner - The Habit Tracker with AI Features (MVP)
github.com/DevBD1/Routiner (not published)

- Built a cross-platform habit-tracking app using React Native (Expo) and Firebase.
- Integrated Google and Apple Authentication via Firebase Auth.
- Implemented multi-language support, goal tracking, and a minimalist user interface.
- Focused on user-centric features and performance across various devices.

Tech: React Native (Expo), Typescript, Firebase Auth, Firestore

EXPERIENCE

Community & Business Manager - Remote

2022-2024

TRENDER SOFTWARE

- Evaluate how the product development roadmap affected user retention and internal processes.
- Manage a small team of 4 mods to maintain a 24/7 moderated community chat.
- Support crisis resolution and cross-functional collaboration under time-sensitive conditions.
- Optimize communication and task management workflows across departments.
- Manage performance tracking and reporting using Google Sheets and data-driven dashboards.
